***TECHNICAL** CONSIDERATIONS (NOT FOR FIELD **REPRESENTATIVE'S** USE):

Products designated USR have been investigated using requirements contained in UL 1059, the Standard for Terminal Blocks.

Products designated CNR have been investigated using requirements contained in Canadian Standard CSA C22.2 No. 158, Terminal Blocks.

Conditions of Acceptability –

1. The mounting suitability shall be evaluated in the end use application.

2. For use only in (or with) complete equipment where the acceptability of the combination is determined by Underwriters Laboratories Inc.

3. The insulating bodies are molded of polymeric materials. Refer to Section General, for manufacture and type. The use of these materials shall be judged in the end use application.

4. The field wiring terminals of this terminal block have been evaluated using the Standard for Equipment Wiring Terminals For Use With Aluminum and/or Copper Conductors, UL 486E. The suitability of these terminals shall be determined in the end-use investigation.

5. These terminals are suitable for copper conductors only.

6. Cat. No. 2006-1207 and -1307, have been evaluated as Protective Conductor Terminal Block, the use of these terminals shall be evaluated in the end use equipment.

7. The terminal block short-circuit rating on Cat. Nos. 2006-1201 2006-1204, 2006-1202, 2006-1207, 2006-1301, 2006-1304, 2006-1302, 2006-1307, 2006-1601, 2006-1602, 2006-1603, 2006-1604, 2006-1671, 2006-1672 2006-1673, and 2006-1674 were determined based on testing in a minimum size enclosure measuring 12 by 10 by 8.25 inches. The suitability of smaller enclosures shall be determined in the end-use investigation.

8. Disconnect types 2006-1671, -1674 have not been evaluated for current interruption (make and break under load).
